ONE DEVICE, MANY USES

X-TOOL

PROFESSIONAL VACUUM CLEANER FOR CONSTRUCTION SITES AND CRAFTSMEN

COMPACT AND EASY TO HANDLE FOR YOUR WORK

The XTOOL is our professional vacuum cleaner designed for construction sites, workshops, car body shops and all craftsmen activities. The vacuum cleaner is equipped with a large filtering surface and has an excellent working autonomy with all kind of fine and humid dust. When the HEPA filters are clogged, it is possible to clean them automatically without interruptions. The electronic system guarantees a soft start mode for starting the suction motor and the automatic switch-off when the tank is full of liquids, in addition to the AUTOMATIC STARTER used with the electric and/or pneumatic tool.

PRACTICAL AND QUICK OPENING OF COMPARTMENTS FOR REPLACEMENT AND CLEANING OF FILTERS

The X-TOOL vacuum cleaner is the best ally for removing dust and debris generated on a construction site. The vacuum cleaner has a very large collection compartment, it sucks up any type of dirt: fine dust, damp dust or coarse debris. The power levels and the large collection compartment complete the job quickly and precisely. Our vacuum cleaners are robust and designed to work with many tools and various accessories in the most difficult conditions, facilitating on-site performance and safeguarding the health of operators.

CONSTRUCTION

X-TOOL

AUTOMOTIVE

Some aspects to consider when choosing a suitable bodywork vacuum cleaner are certainly the filter unit, the motor power and the accessories for the various processes. The characteristics of X-TOOL are designed for this specific sector and guarantee not only the protection of the working environment, but also greater comfort and professionalism for the operator. The advanced electronics allow the automatic start of the suction and cleaning of the filter by turning on and releasing the tool. In addition, the X-TOOL vacuum cleaner is equipped with an excellent system that guarantees the M-Class filtration, with an efficiency of 99.9% for the safety of working environments.

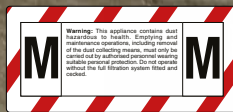

X-TOOL

NAUTICAL

The use of an X-TOOL vacuum cleaner in the nautical sector guarantees excellent suction performance for removal of residual dust which can often be extremely harmful to the health of workers. The micro particles of residual materials can get into the various environments and compromise subsequent processes unless cleaned thoroughly. Environments and surfaces must be as clean as possible and free of dusty residues, such as fiberglass and hull debris. The XTOOL vacuum cleaner guarantees a high level of filtration by re-emitting clean and healthy air output for the operator.

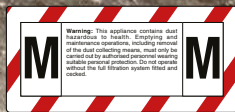

X-TOOL

JOINERY

The use of the X-TOOL vacuum cleaner for wood dust plays a central role in cleaning and maintaining carpentry machinery : dust gets everywhere particularly in delicate processing areas. This is why it is essential to use the X-TOOL vacuum cleaner which makes cleaning simple, quick and effective. In fact, it is possible to vacuum all the residual material that gets into tiny spaces of equipment during sanding processes. This reduces tool wear and machine breakdowns. Every machine in an operating system is important to each of its specific functions and the production of waste material is inevitable. Non-aspirated processing residues lead to poor surface finishes and in the most serious cases to evident scratches on the finished product.
